

Experience	BehavAI <i>Founding Product Designer & Front-End Developer</i>	Mar 2025 – Present Pittsburgh, PA
	- Designed and built an AI-assisted workflow that converts raw clinical session notes into audit-ready reports; accelerated iteration through rapid prototyping and front-end development. 1st Place, Techstars Startup Weekend Pittsburgh 2025 (30+ teams). - Owned end-to-end UX in partnership with engineering for a HIPAA-aligned MVP; synthesized 150+ surveys and 15+ interviews into human-in-the-loop review/edit flows with clear states for revision, error handling, and user-controlled exports.	
	Personalized Learning Squared, PLUS <i>Product Designer</i>	Jan 2025 – Present Pittsburgh, PA
	- Prototyped UX and visual redesign of PLUS’s marketing site for a K-12 tutoring platform reaching 3,000+ students and 500+ tutors. - Shipped a responsive design system unifying value propositions across three audiences (families, tutors, school partners), improving information hierarchy and accessibility.	
	South Fayette School District (Capstone) <i>Product Manager & UX Designer</i>	Jan 2025 – Aug 2025 Pittsburgh, PA
	- Drove 0→1 product strategy and UX for StackBuilder, a visualization tool helping students connect courses and activities to future opportunities, with supporting experiences for families and counselors. - Conducted research with 100+ students; ran usability tests with 25 participants; translated insights into interaction patterns piloted in district course-planning workflows.	
	Aquatonomy <i>UX Designer</i>	Sep 2024 – Jan 2025 Pittsburgh, PA
	- Redesigned a stateful operator console for autonomous underwater inspection systems, reducing workflow complexity by ~30% and improving operator confidence through clearer modes, status visibility, alerts, and action points. - Led field research with divers, engineers, and public safety teams; delivered 12 high-fidelity prototypes and a service blueprint adopted by 20+ stakeholders into the product roadmap.	
	MoonRanger & NASA <i>Mission Operations Designer</i>	Aug 2024 – Dec 2024 Pittsburgh, PA
	Designed a Mission Control interface for MoonRanger (CMU/NASA autonomous lunar rover), translating complex telemetry into clear system states, alerts, and operator actions to support fast, confident decisions.	
	Reingold, Inc. <i>Digital Project Management Intern</i>	May 2023 – Sep 2023 Alexandria, VA
	Coordinated cross-functional UX, content, and engineering teams on federal web campaigns (NBA Mind Health, VA OMHSP); led launch QA supporting stable, accessible experiences at scale.	

Education	Carnegie Mellon University , School of Computer Science <i>Master of Human-Computer Interaction (MHCI)</i>	Aug 2025 Pittsburgh, PA
	University of Virginia , College of Arts & Sciences <i>B.A. in Cognitive Science, with Distinction</i>	May 2024 Charlottesville, VA
Relevant coursework: Programming Usable Interfaces, Interaction Design, User-Centered Research & Evaluation, Design of AI Products, HCI in Software Development, Usability Engineering, Data Structures & Algorithms.		

Skills	Design & Research:	
	Interaction Design, Design Systems, Visual Design, Systems Thinking, Information Architecture, Heuristic Evaluation, Contextual Inquiry, Product Strategy, Service Design, User Research, Usability Testing, Accessibility & Inclusive Design.	
	Technical Skills:	
	HTML/CSS, JavaScript, TypeScript, React, SwiftUI, Swift, Node.js, SQL/PostgreSQL, Python, Git.	
	Tools & Platforms:	
	Figma, Framer, FigJam, Adobe Illustrator, After Effects, Webflow, Spline, VS Code, Xcode, GitHub, Azure DevOps, Miro, Notion. AI tools: Claude, ChatGPT, GitHub Copilot, Cursor.
