

Experience

BehavAI

Mar 2025 — Present

Co-Founder, Product Designer & Front-End Developer

Pittsburgh, PA

- Built BehavAI, an AI assistant that turns ABA session notes and behavior data into audit-ready reports, reducing documentation load for clinics and winning 1st Place at Techstars Startup Weekend Pittsburgh 2025 out of 30 + teams.
- Led product, UX, and front-end development for a HIPAA-aligned MVP, using 150 + survey responses and 15 + therapist interviews to design human-in-the-loop workflows with clear review, edit, and failure states.

Personalized Learning Squared (PLUS)

Jan 2025 — Present

Product Designer

Pittsburgh, PA

- Prototyped UX and visual redesign of PLUS's marketing site for a K-12 tutoring platform serving 3,000 + students and 500 + tutors.
- Consolidated value propositions across pages and shipped a responsive design system that improved clarity and consistency for families, tutors, and school partners.

South Fayette School District (Capstone)

Jan 2025 — Aug 2025

Product Manager & UX Designer

Pittsburgh, PA

- Led 0-1 product strategy and UX for StackBuilder, which mapped students' courses and activities over four years and linked them to future opportunities for students, families, and counselors.
- Designed and facilitated in-class activities and small-group interviews with 100 + students, then usability tested prototypes with 25 students and translated insights into interaction patterns piloted in the district's course-planning workflow.

Aquatonomy

Sep 2024 — Jan 2025

UX Designer

Pittsburgh, PA

- Partnered with a full-stack robotics team building autonomous underwater inspection systems to redesign the operator console and data tools, cutting operator workflow steps by ~30% through clearer modes, status cues, and action points.
- Conducted field and usability research with divers, engineers, and public safety teams, then delivered 12 high-fidelity console prototypes plus a service blueprint reviewed by 20 + stakeholders and adopted into the product roadmap.

MoonRanger & NASA

Aug 2024 — Dec 2024

Mission Operations Designer

Pittsburgh, PA

- Shaped the Mission Control System interface for MoonRanger, an autonomous lunar rover developed by CMU with NASA, to support clear states, fault handling, and operator situational awareness during a ~2-week lunar mission.
- Translated rover telemetry and command flows into clear real-time status views, alerts, and operator actions for mission control.

Reingold, Inc.

May 2023 — Sep 2023

Digital Project Management Intern

Alexandria, VA

- Coordinated UX, content, and engineering teams on web campaigns for NBA Mind Health and the VA Office of Mental Health and Suicide Prevention (OMHSP).
- Ran launch QA across content, links, and responsiveness to ensure stable, on-brand experiences.

Education

Carnegie Mellon University, School of Computer Science

Aug 2025

Master of Human-Computer Interaction (MHCI)

Pittsburgh, PA

University of Virginia, College of Arts & Sciences

May 2024

B.A. in Cognitive Science, with Distinction

Charlottesville, VA

Relevant coursework: Programming Usable Interfaces, Interaction Design, User-Centered Research & Evaluation, Design of AI Products, HCI in Software Development, Usability Engineering, Data Structures & Algorithms.

Skills

Design & Research:

Interaction Design, Product Strategy, Systems Thinking, Information Architecture, Design Systems, Service Design, Journey Mapping, User Research, User Interviews, Usability Testing, Contextual Inquiry, Concept Testing, Heuristic Evaluation.

Technical Skills:

HTML/CSS, JavaScript, TypeScript, React, SwiftUI, Swift, Node.js, SQL/PostgreSQL, Python, Java, C, R, Git.

Tools & Platforms:

Figma, FigJam, Framer, Jitter, ScreenStudio, Adobe Illustrator, After Effects, Webflow, Spline, Procreate, VS Code, Xcode, AI coding assistants.
