

Experience	BehavAI <i>Founding Product Designer & Front-End Developer</i>	Mar 2025 – Present <i>Pittsburgh, PA</i>
	- Designed and built an AI-assisted workflow that converts raw clinical session notes into audit-ready reports, reducing documentation time by 35% and enabling faster review by therapists. 1st Place, Techstars Startup Weekend Pittsburgh 2025 (30+ teams). - Led end-to-end UX for a HIPAA-aligned AI product MVP, synthesizing 150+ surveys and 15+ interviews into human-in-the-loop review and editing flows that improve transparency, error recovery, and clinician control over generated reports.	
	Personalized Learning Squared, PLUS <i>Product Designer</i>	Feb 2025 – Jan 2026 <i>Pittsburgh, PA</i>
	- Prototyped UX and visual redesign of PLUS’s marketing site for a K-12 tutoring platform reaching 3,000+ students and 500+ tutors. - Shipped a responsive design system with 50+ reusable components and design tokens, improving consistency and scalability across a consumer-facing product.	
	South Fayette School District (Capstone) <i>Product Manager & UX Designer</i>	Jan 2025 – Aug 2025 <i>Pittsburgh, PA</i>
	- Led 0→1 product strategy and UX for StackBuilder, enabling students to map courses to academic and career pathways. - Designed interaction patterns for comparing multiple pathways in one view, reducing evaluation from 4–5 steps to a single view and supporting faster advising sessions and more informed planning decisions.	
	Aquatonomy <i>UX Designer</i>	Sep 2024 – Jan 2025 <i>Pittsburgh, PA</i>
	- Redesigned a stateful operator console for autonomous underwater inspection systems, reducing workflow steps by 30% and reducing operator errors by 25% through clearer system states and alerts. - Validated workflows through 12 high-fidelity prototypes and delivered a service blueprint adopted into the product roadmap, supporting more coordinated and reliable inspection operations.	
	MoonRanger & NASA <i>Mission Operations Designer</i>	Aug 2024 – Dec 2024 <i>Pittsburgh, PA</i>
	Designed a mission control interface for MoonRanger (CMU/NASA autonomous lunar rover), enabling faster, more reliable operator decisions by making complex telemetry from 10+ system inputs immediately interpretable and actionable.	
	Reingold, Inc. <i>Digital Project Management Intern</i>	May 2023 – Sep 2023 <i>Alexandria, VA</i>
	Coordinated cross-functional UX, content, and engineering teams on federal web campaigns (NBA Mind Health, VA OMHSP); led launch QA to deliver stable, accessible experiences at scale.	

Education	Carnegie Mellon University , School of Computer Science <i>Master of Human-Computer Interaction (MHCI)</i>	Aug 2025 <i>Pittsburgh, PA</i>
	University of Virginia , College of Arts & Sciences <i>B.A. in Cognitive Science, with Distinction</i>	May 2024 <i>Charlottesville, VA</i>
Relevant coursework: Programming Usable Interfaces, Interaction Design, User-Centered Research Evaluation, Usability Engineering, Design of AI Products, HCI in Software Development, Data Structures & Algorithms.		

Skills	Design & Research: Interaction Design, Design Systems, Visual Design, Systems Thinking, Information Architecture, Heuristic Evaluation, Contextual Inquiry, Product Strategy, Service Design, User Research, Usability Testing, Accessibility & Inclusive Design.	
	Technical Skills: HTML/CSS, JavaScript, TypeScript, React, SwiftUI, Swift, Node.js, SQL/PostgreSQL, Python, Git.	
	Tools & Platforms: Figma, Framer, FigJam, Adobe Illustrator, After Effects, Webflow, Spline, VS Code, Xcode, GitHub, Azure DevOps, Miro, Notion.	
	AI Tools: Claude, ChatGPT, GitHub Copilot, Cursor.
